Anthony Vigil, Regulatory Agent
Regulatory Unit No. 3
U. S. Army Corps of Engineer District, Sacramento
1403 South 600 West, Suite A
Bountiful, UT 84010

Dear Anthony:

In order to eliminate any possible conflict with the white pelican breeding population at Gunnison Island, Great Salt Lake Minerals Corporation agrees not to conduct dredge operations associated with the North Clymer Bay Canal for more than five (5) consecutive days between the period of 1 March through 31 August of any year the permit is in effect. Great Salt Lake Minerals Corporation would halt consecutive day construction activities after five days for a minimum of two weeks prior to re-initiating any construction activities. Great Salt Lake Minerals Corporation understands that this restriction on consecutive days is only for dredging activities that occur within the above stated time frame. No time restrictions would be necessary for work done between 1 September and 28 February of any year.

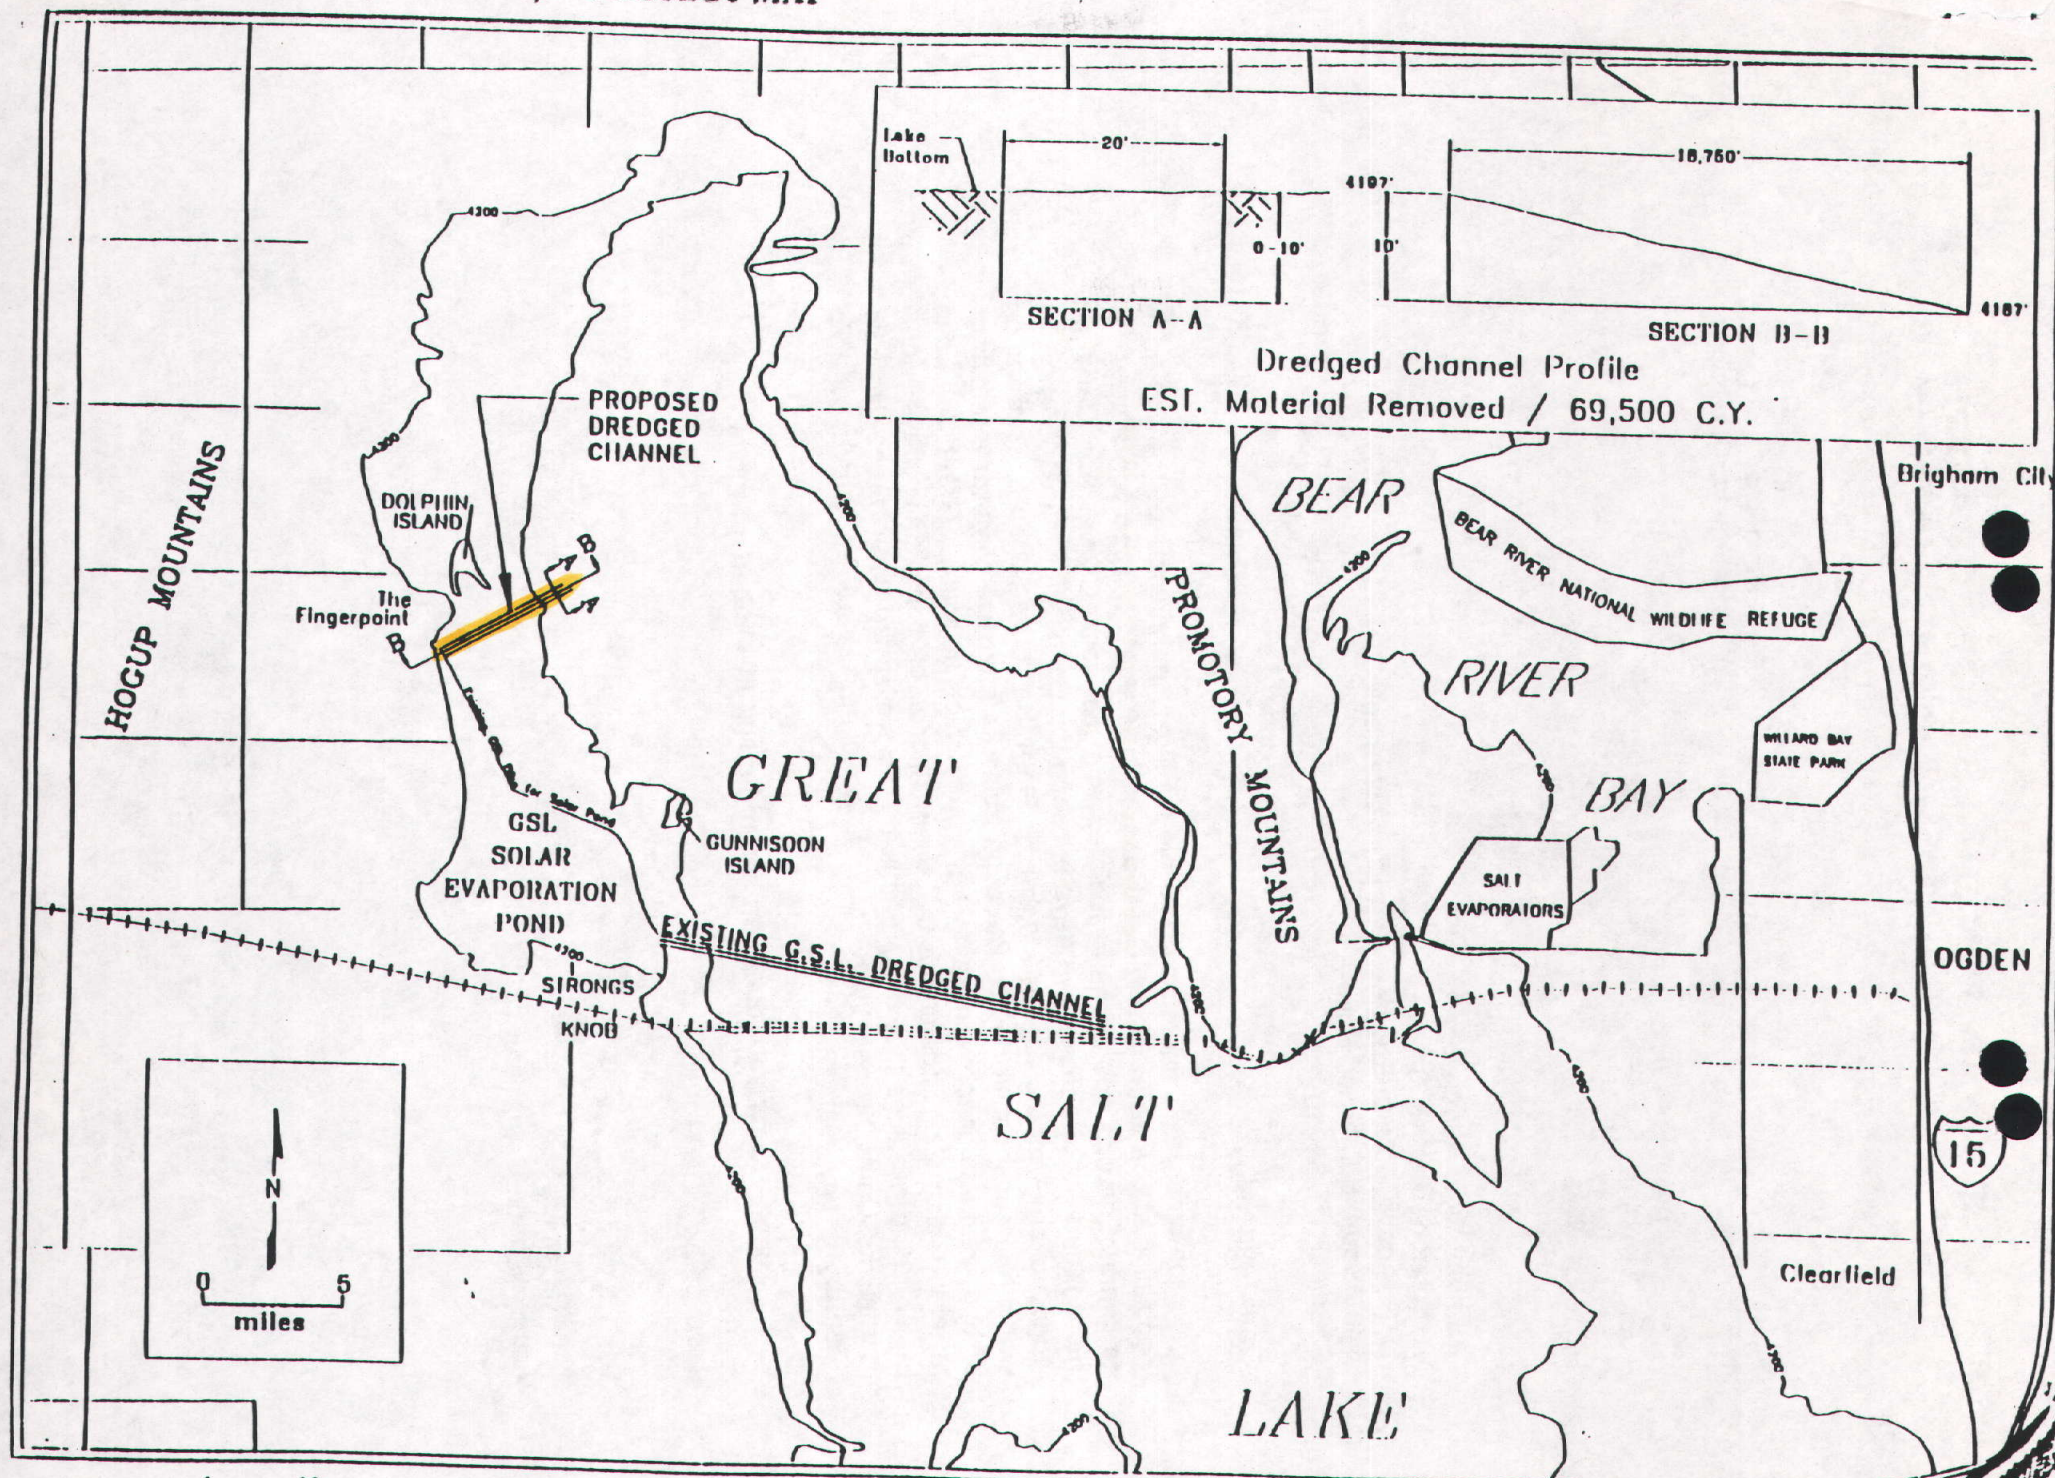

Thank you for your consideration regarding this important matter.

Respectfully,

A handwritten signature in dark ink, appearing to read 'M. J. Reynolds', written over the printed name.

M. J. Reynolds
Vice President-Operations
